

Migrate to AWS with Confidence

The AWS Migration Acceleration Program provides a clear pathway to migrate your workloads and modernise your operations in the Cloud.

Organisations that migrate to AWS experience....

31% in Cost Savings

Create more cost-effective IT environments by optimizing compute, storage, and database costs or moving away from running own IT infrastructure and generate average cost savings of **31%**

62% in Efficiency Gains

Reduce time spent on system administration tasks and through migrating to AWS demonstrate an ability to run their IT infrastructure management **62%** more efficiently.

69% More Uptime

Increase service availability and reliability and gain the ability to respond to rapidly changing levels of demand. Customers who move to AWS achieve a reduction of **69%** in unplanned downtime.

Getting Started is Risk Free!

Through Ubertas Consulting, an assessment of your operation is no cost, so that you can understand how AWS can support your migration journey.

Take the 1st Step with Ubertas Consulting. Organisations can understand more about their migration journey and eligibility for the AWS Migration Acceleration Program through the Migration Assessment, an analysis of your options, 100% funded by Ubertas Consulting to ensure there is no cost to starting your journey.

Current State - An assessment of your existing environment from both a technical and commercial perspective to generate an understanding of the scope of a potential migration.

Define the Future - A representation of a future AWS architecture, embedding security, performance and resilience in accordance with the AWS Well-Architected Framework.

Plan the Path - Learn how the Migration Acceleration Program would support your journey, combining the proven methodology with free tooling and commercial support.
