How do you become "Well-Architected" with AWS?

Ubertas Consulting is a member of the AWS Well-Architected Programme which is aimed at helping customers ensure best practice is adopted as they design a cloud native environment. We are the UK's leading proponent of Well-Architected having assisted >250 organisations, across all market sectors and the full range of AWS services align to best practice.

What is AWS Well-Architected?

The Well-Architected framework is a structured set of best practices, published and maintained by AWS with the objective of ensuring that customers optimize their workloads around five (5) Pillars:

Operational Excellence
Run and monitor systems to deliver business value and to continuously improve supporting processes and procedures.

Security
Protect data & systems through the establishment of controls to ensure information security.

Reliability
Meet your performance requirements & make informed decisions to maintain efficiency as business needs evolve.

Performance Efficiency
Run and monitor systems to deliver business value and to continuously improve supporting processes and procedures.

Cost Optimisation
Ensure that your architecture is cost optimised through by utilising AWS resources & purchase models appropriately.

Sustainability
Minimize the environmental impacts of running cloud workloads.

Why take a Well-Architected Review with Ubertas Consulting?

The Well-Architected Review is provided free-of-charge to customers running one or more workloads on AWS. Reviews are completed in partnership with AWS and for a limited time $5,000 of AWS service credits are available as an incentive for customers who undertake a review and agree to take remediation against areas not aligned to best practice.

3 steps to becoming Well-Architected

Review
A free, 3-hour exploration of your nominated AWS workload encompassing Security, Reliability, Operations, Performance and Cost.

Plan
A free, 1-hour workshop to discuss the outputs of the Well-Architected Review and prioritise the remediation actions to better align to best practice.

Act
Commence remediation activities to address priority areas within 30 days of the Well- Architected Review to qualify for $5,000 of AWS service credits.
