

AWS Well-Architected: Optimise your AWS Workloads

WHAT IS WELL-ARCHITECTED?

The Well-Architected framework is a structured set of best practices, published and maintained by AWS with the objective of ensuring that customers optimise their workloads around six key pillars. Incorporating these pillars into your architecture helps produce stable and efficient systems.

**Cost
Optimisation**

Security

Reliability

Performance

**Operational
Excellence**

Sustainability

80%

of customers find there are improvements to be made in the security of their account.

55%

of customers we have worked with make Well Architected a core part of their business approach.

30%

of our customers make cost savings of 25% or more.

BECOME WELL ARCHITECTED: WORKING WITH THE GLOBAL LEADER OF WELL ARCHITECTED REVIEWS

At Ubertas Consulting, we're a proud Validated AWS Well-Architected Partner. We're one of the first Partners globally to achieve this standard, demonstrating our expertise and unique approach to bring the most value as recognised by AWS and hundreds of our customers. Through a cost neutral Well-Architected Review we help our clients align to best practices.

As part of our commitment to sustainability, for every Well-Architected Framework Review Ubertas Consulting conduct on behalf of our clients, we plant ten trees in partnership with TreeApp.

UBERTAS CONSULTING CLOUD MATURITY SCORE

The 'Ubertas Consulting Cloud Maturity' score has evolved from years spent with our customers, supporting them as they grow, scale and mature. Our insight in the Cloud enables you to be aware of areas for potential improvement to strengthen your architecture and develop your accounts maturity.

HOW IT WORKS: ACCESS TO THE EXPERTS

Step One

Join Ubertas Consulting for your Well Architected Review, where one of our Senior Solutions Architects assess your AWS account to show you how you perform across the 6 pillars and your UCCM score

Step Two

We will meet to Debrief on the insights and recommendations for remediations. We will then work with you to Remediate the identified issues .

Step Three

Upon completion we will generate a Post Remediation Report summarising the improvements made to your account and any next steps recommended for you.
